6. Accounting for Price Level Changes or Inflation Accounting is a system of accounting which
Regularly records all items in financial statements at their current values.
Objectives of Inflation Accounting are:

- To show the real profit or loss for the accounting period as against the unrealistic profit or
- loss on the basis of historical costs;
- To indicate the real financial position of the business in current costs rather than the
- conventional financial position on the basis of historical costs;
- To indicate the real capital employed in the business;
- To ensure that sufficient funds will be made available for the replacement of fixed assets, by charging depreciation on current values.
OR
- To remove the various distortions with which financial statement based on historical costs suffer;
- To provide for more meaningful inter-period comparison;
- To improve the meaning and measurement of income and expenses in the face of changing purchasing power of money;
- To improve decision making in the organisation.
